

# TRINITY ACADEMY LEEDS

# GOLDEN TOOLKIT

Below are some ways we help you to learn in lessons so that you can understand more and remember more!

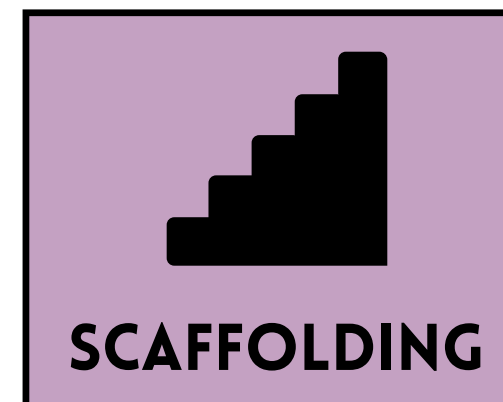

**TALK**

We might give you some time to talk to a partner about your ideas or to write down your ideas on your MWB before we ask you to answer a question.

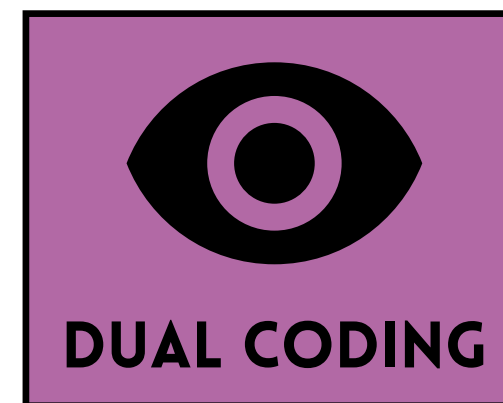

**PHONICS**

To help you with reading we might ask you to break down tricky words into parts and sound these out. We will then ask you to blend these sounds together so that you can confidently read and pronounce this word.

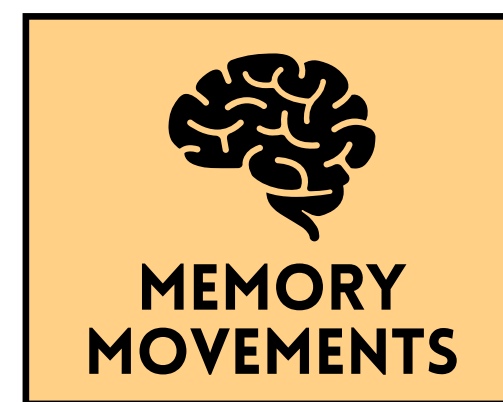

**SCAFFOLDING**

Sometimes you will be given the start of a sentence to complete or asked to fill in the gaps in a paragraph with key words. We might also give you word banks of brilliant vocabulary to help you to strengthen your writing.

**DUAL CODING**

Sometimes we might ask you to draw or explain an image, alongside a text, to help you to understand or remember a key piece of information or process.

**MEMORY MOVEMENTS**

Physically acting out certain words or pieces of knowledge can really help you remember them and can be a lot of fun! We might ask you to use hand gestures or to act out certain bits of the lesson.
