DT	DESIGN CHALLENGE BIOMIMICRY	YEAR 7	UNIT 2
1. Research		2. Drawing Techniques	Academy Leeds
bio = life mimicry = the skill of imitating something. Biomimicry is a practice that learns from and mimics the strategies found in nature to solve human design challenges. Design brief A document that outlines and instructs what to do.		Two dimensional. (shape A shape having two di	mensions (length and width).
Function What is the products job/role? How well does it work? Could it be improved?		Three dimensional. (form) A form having two dimensions (length, width and depth).	
Inspirational moodboard Mood boards are often used when creating art or design projects as it can help give direction and provide inspiration. It helps narrow down the focus of your project and serves as an important reference point throughout the creative process.			
Client		Crating method	
The person who sets the requirements of the product. User		Drawing an object inside a crate.	
The person who is going to be using the product. Evaluation		Oblique view	
	flecting and judging the quality of	A view that shows an object from the front, with its sides	
Product evaluation		projected at 45 degrees.	
Assessing a produ	uct's performance, features and market		

3. Iterative Design

Facts about Sir James Dyson

4. Sir James Dyson

YEAR 7

He is a British inventor/designer.

- Founder and Chairman of Dyson.
- Founder and Chairman of Dyson.
- Designs/manufactures household appliances.
 - Produced 5,127 prototypes for his first vacuum cleaner.

UNIT 2

Produced 5,12/ prototyp

Analysis

of testing.

A detailed examination of the elements of something. This involves breaking the design brief down. What is the problem that needs solving?

Iterative design is a circular design process that

Design ideas

This involves creating a series of freehand sketches of design ideas that may help solve the problem in the design brief. These could be different from each other or developments of an original idea.

models, evaluates and improves designs based on the results

Modelling

The activity of making three-dimensional models.

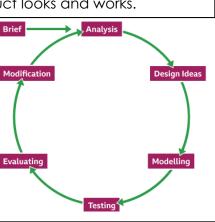

Modelling ideas in card, paper, clay or other materials
can create a cheap and quick way to do initial trials with
a product. Using an easy to modify material provides a
good way of seeing how a product looks and works.

Testing

The process of checking the model.

Modification

The action of change.
Designers revisit the models and design ideas to make improvements.

Products produced by Dyson

Household appliances manufactured by Dyson:

- Vacuum cleaners.
- Hand dryers.
- · Hair dryers.
- Air wrap (hair curling tool).
- Bladeless fans
- Heaters
